Grand Total										4	\$ 300.00

FREIGHT ADVISORY: FREIGHT QUOTES are based on the information that you have provided. They are ESTIMATES ONLY and are NOT BINDING. The freight characteristics of the shipment based upon final packaging will take precedence. This estimate is not intended for invoicing purposes and reflects the rates in effect at the time of inquiry and is subject to change without notice.

Estimated Freight 40

Product Advisory: Creative Millwork's warranty is strictly limited to the adhesion of the tape to the SDL bar component. This excludes any/all subsequent or consequential labor or damage costs (beyond the replacing the product itself). Any warranty is null & void if the SDL components are not installed properly - or if the product is modified or abused by others. This excludes all implied warranties. It is always recommended that the SDL application be done by certified technicians only under proper conditions. This product was developed for in shop application under a controlled environment. The tape is temperature sensitive.

SDL bars do not fit snugly against the stop or sash. A slight gap is required for expansion & contraction. The recommended adhesion promoter is included with your kit at no charge. Creative Millwork is not responsible for the application method or placement of SDL bars.

Please review the above information for accuracy - any change in this information requires a requote.
