USE VARIANCE – PLEASE ANSWER THE FOLLOWING (add additional information as necessary):

A use variance is requested to permit the following: _____

For the Zoning Board to grant a request for a use variance, an applicant must prove that the zoning regulations create an unnecessary hardship in relation to that property. In seeking a use variance, New York State law requires an applicant to prove all four of the following "tests".

- I. That the applicant cannot realize a reasonable financial return on initial investment for any currently permitted use on the property. "Dollars & cents" proof must be submitted as evidence. The property in question cannot yield a reasonable return for the following reasons:

A. Submit the following financial evidence relating to this property (attach additional evidence as needed):

1) Date of purchase: _____ Purchase amount: \$ _____

4) How many times has the property been shown and with what results? _____

2. That the financial hardship relating to this property is unique and does not apply to a substantial portion of the neighborhood. This previously identified financial hardship is unique for the following reasons:

AREA VARIANCE – PLEASE ANSWER THE FOLLOWING (add additional information as necessary):

6.4.3 B 1 and B 2.

To grant an area variance, the ZBA must balance the benefits to the applicant and the health, safety, and welfare of the neighborhood and community, taking into consideration the following:

- 1. Whether the benefit sought by the applicant can be achieved by other feasible means. Identify what alternatives to the variance have been explored (alternative designs, attempts to purchase land, etc.) and why they are not feasible.

The garage could not be attached to the home on the north side as neighboring property (55 Gilbert) already violates side yard set backs.

The garage could not be attached to the home on the south side because the septic system and well and well pipes servicing the property were located on the south side of home. (Well is now abandoned)

The garage couldn't be located in the rear of the home due to location of leach field and would be too close to a stream.

At the time the garage was built, the zoning law allowed 30% of total floor area of the residence and did not specify "totally within structure" - see ATTACHED ordinance

The need for one and one-half employees is due to job sharing between employees.

- 2. Whether granting the variance will produce an undesirable change in the character of the neighborhood or a detriment to nearby properties. Granting the variance will not create a detriment to nearby properties or an undesirable change in the neighborhood character for the following reasons:

Garages and Home occupations are both allowable in the zone. The neighborhood now has garages and structures much larger than subject garage. Office use does not generate much additional traffic, office is located in garage which fits in with neighborhood. Addition of one 1/2 time employee does not create undesirable change n character of neighborhood as only impact is one extra trip to office, and we are well below our trips allowed per day per the existing zoning.

3. Whether the variance is substantial. The requested variance is not substantial for the following reasons:

The variance is not substantial. All other requirements for home occupation are met with the exception of office being in detached garage, and it impossible to have attached garage to home. Area which occupies office is based on a percentage of the size of the home. Since my home is relatively small, it makes any home office, even within the structure, potentially too small to be practical. In addition, when garage was built upon information and belief, the zoning law allowed 30% of total floor area of the

residence. If that was still the case, a variance on that issue would not be necessary. In addition, the prior zoning did not specify "totally within structure", therefore an interpretation could have allowed office in detached garage and again, would not have needed a variance.

The addition of one 1/2 time employee is not substantial and even with the addition of that one extra employee on some days, not all, we are below the amount of trips allowed to be generated per existing zoning.

4. Whether the variance will have adverse physical or environmental effects on neighborhood or district. The requested variance will not have an adverse physical or environmental effect on the neighborhood or district for the following reasons:

No change is being made to the neighborhood. The office is supplemental to and secondary to the use as a garage for our home. The garage is a two car garage. Newer structures in the neighborhood have been allowed that have much greater physical and environmental impact on the neighborhood including office buildings and convenience stores.

The use of the second floor of garage as a home office has a positive effect on environment as it reduces another car on the road traveling to an office.

The second 1/2 employee does not create an adverse effect as our activity already generates less trips than allowed by the zoning.

5. Whether the alleged difficulty was self-created (although this does not necessarily preclude the granting of an area variance). Explain whether the alleged difficulty was or was not self-created:

Although the office use was self created, the necessity that the garage be detached was not self created given the only location available for the well and septic system.

The use of the garage space as an office may have been allowed without a variance under zoning code in effect at the time

garage was built as the zoning law allowed 30% of total floor area of the residence and did not specify "totally within structure". Please see attached pages from prior zoning.
